TECHNICAL STACK

- **Front End:** React (6+ years), Redux, TypeScript, Jest, Backbone, ES5/6/7, Less/Sass/CSS Modules/PostCSS, Storybook
- **Server & Back End:** NodeJs, NestJs, RESTful API, GraphQL, K8s, Docker, Kafka, Vercel, PHP, Java
- **Cloud & Database: AWS** MS Azure, Alibaba Cloud, MySQL, MongoDB, GCP
- **Tools:** Git, Webpack, Gulp, NPM, Yarn, CI/CD, Mixpanel, Segment, Pendo, Contentful, LaunchDarkly, Kameleoon, Adobe Target, Quantum Metrics, Sentry

“Vera is dedicated to providing quality work. She checks and rechecks her project before turning it in for presentation to the final users. She strives to make her programs as user friendly as possible understanding that not everyone is an expert programmer.”

— Amos Chen
Dev Specialist at
Alibaba

PROFESSIONAL SUMMARY

An enthusiastic software engineer with a decade of professional experience including several years focused in full stack. Possessing comprehensive skills in all aspects of development with expertise spanning multiple industries, including marketing and advertising, enterprise collaboration, Internet of Things, and automation testing. Well-versed in Agile engineering practices, utilizing them to foster efficient and collaborative development processes.

EDUCATION

- **Post Degree Diploma, Douglas College, Vancouver, BC, Canada** 2019 - 2020
Information Communication & Technology
- **Bachelor of Science, Nanjing Tech University, Nanjing, China** 2009 - 2013
Computer Science

WORK EXPERIENCE

Engineer II @ Lululemon athletica Jan. 2024 - Current

Global Marketing & Brands Technology team member for a premium athletic apparel company, collaborating across teams to support A/B Testing within the origination by leveraging different tools

- **Welcome Offer feature**
 - Designed and implemented a scalable welcome offer feature for the US new visitors using Contentful CMS for content management
 - Embraced LaunchDarkly for targeted eligibility, reducing deployment dependencies while increasing marketing
- **A/B Testing Platform Migration**
 - Led migration from Adobe Target to Kameleoon, from the POC testing to select the right vendor to the production pilot test
 - Implemented tracking standards and feature flags to ensure seamless transition
 - Embraced OneTrust as the privacy method to indicate the availability of users' data and analyze their behaviour
 - Reduced the LCP from 7.53s to 1.92s after switching to the new AB Testing tool
- **Observability & Data Systems**
 - Configured affinity data models to power personalization engines across micro-frontend architecture
 - Implemented metadata collection pipelines feeding Sentry for real-time error

Senior Full Stack Engineer @ Sauce Labs Inc., Jan. 2021 - May 2023 (2 years 4 months)

Growth team member for a continuously testing company, collaborating across teams to deliver new experimental features using Agile development practices.

- **Sauce Labs (web app + signup)**
 - Employed NextJS to construct user-friendly sign-up process for new users, resulting in improved product activation and accelerated value realization
 - Coordinated user identification and tracking using Segment across products and documentation websites, leveraging Mixpanel and Pendo for usage analytics to inform future decision-making
 - Created REST APIs and services using NodeJS and Kafka for Growth microservice, facilitating user registration and analysis of user traits and actions to enhance the quality of sales leads
 - Optimized the CI/CD pipeline to reduce running time to 60%

"It was a pleasure working with Vera on a daily basis. She likes to deeply understand business problems she is dealing with and does not hesitate to share ideas how to make the solution even better. Vera is a good connector and definitely a people person - she was a key factor to deal with dependencies efficiently and exchanging the knowledge between teams (including non-engineering ones). I admire Vera's dedication to constant self-development and curiosity about what's happening in tech and beyond."

— Andrzej Figas

Director of Engineering at
Sauce Labs

"Vera impressed me with not only her 'student for life' mindset, but also her amazingly positive attitude and communication skills. Vera is the kind of employee I would hire again with no hesitation."

— Huaqiao Li

Core Front-end Dev at
Teambition

"She takes her work very seriously, and was always striving to stay on top of the latest development in the field of Front-End development. Vera performs well under stress and tight deadlines, and I would wholeheartedly recommend her."

— Lucia Lu

Front-end Dev at
Fancy Pants Group

- Spearheaded the implementation of feature flags for A/B experiments and rapid prototyping, leading to measured successes and widespread adoption throughout the organization
- Created a plugin Platform configurator component for reuse on different locations
- Supported the testing script generator with different languages (Python, JavaScript, Ruby, C#, etc.)
- **Sauce Labs Website**
 - Wrote a node script to migrate 1000+ articles from original site
 - Collaborated closely with the marketing team to develop the new corporate website leveraging React and Contentful (CMS), to improve user sign-up quality as the first step of the onboarding experience
 - Utilized Vercel practices for deployment and monitoring

Senior Software Engineer @ Alibaba Cloud, Aug. 2017 - Sep. 2019 (2 years)

IoT & Cloud Services (React, MQTT, Node.js, Technical Leadership)

- **IoT Studio**
 - Led development of 20+ virtualized components (graphs/diagrams/text) with real-time data streaming to cloud services
 - Engineered MQTT-based long-channel solution for IoT device communication, implementing reconnection/destruction mechanisms ICA Data Platform
 - Designed system architecture for thing templates/attributes/services, connecting partners with Alibaba's core cloud capabilities
 - Facilitated cross-functional technical design meetings to streamline full development lifecycle
- **Consoles**
 - Managed teams and implemented several consoles from scratch to release to production environment
 - Built npm plugin for legacy project localization, reducing manual effort by 90% (10 person-days → 1)

Senior Front-End Developer @ Teambition, Sep. 2015 - Jul. 2017 (1 year 10 months)

Recruited to top enterprise collaboration platform to build single-page web application. Began mastering React and related skills from this point forward.

- **Teambition**
 - Built interactive Gantt chart with drag-and-drop task creation, view-size calculations, and optimized pagination loading.
 - Improved performance by 70% (5.2s → 1.5s) via sprite images, lazy loading, SSR, and functional React components.
 - Integrated Chinese social platforms (WeChat/Weibo) for third-party logins, resolving API/account structure mismatches.
- **Annual User Review**
 - Developed reusable mobile-first animations with GreenSockJS, delivering a dynamic review portal in 3 days.

Web Developer @ Fancy Pants Group, Mar. 2013 - Jun. 2015 (2 years 4 months)

Marketing/advertising agency (HTML5, CSS3, GSAP, Cross-Browser Compatibility)

- **Online dynamic HTML5 animations**
 - Delivered 50+ adaptive campaigns for diverse viewports (desktop/mobile) and browsers (IE8+, Android 2.x).
 - Implemented animations using **Three.js**, **D3.js**, and fallbacks for legacy systems
 - Pioneered downgrade solutions for older browsers while maintaining modern UX/UI standards.
